Experience

Asia-Pacific Bank	Senior Web Developer	10/2025 - Present
• Develop and maintain the UI for a loan origination system using React. • Maintain legacy frontend functionality built with Razor and Kendo UI. • Build reusable UI widgets and components for internal administrative interfaces.		

MetaLamp	Frontend Developer	06/2024 - 08/2025
• Developed Web3 and Telegram Mini App products using React, TypeScript, Next.js, Redux, Effector, and shadcn/ui. • Integrated REST APIs, cryptocurrency wallets, TON smart contracts, TonConnect, and Wagmi. • Implemented responsive mobile-first interfaces, internationalization, themes, animations, and UX improvements. • Collaborated with international clients on API integrations and frontend functionality.		

Setevye Resheniya LLC	Frontent Developer	02/2021 - 04/2024
• Developed and maintained an administrative interface for an XaaS billing platform using React, TypeScript, and Ant Design. • Developed front-end features for billing workflows, including payments and invoicing, and integrated them with backend APIs. • Migrated the legacy administrative interface from ExtJS to React and Ant Design, improving usability and maintainability. • Worked in an Agile team and resolved UI/UX and frontend performance issues.		

CoMagic	Frontent Developer	05/2021 - 08/2021
- Developed and maintained an administrative interface for a call-tracking platform using React, TypeScript, and MobX State Tree. - Built reusable UI components for the company’ s internal component library. - Refactored and improved several sections of the administrative portal.
